 GMT ASTM A380-2013.pdf |  
 Stainless Steel | Corrosion -  
 ASTM's steel standards are  
 instrumental in classifying,  
 evaluating, and specifying the  
 material, chemical, mechanical,  
 and metallurgical properties of  
 the different types of steels,  
 which are primarily used in the  
 production of mechanical  
 components, industrial parts, and  
 construction elements, as well as  
 other accessories related to them.

 GMT Steel Standards - This is a  
 list of ASTM International  
 standards. Standard designations  
 usually consist of a letter prefix  
 and a sequentially assigned  
 number. This may optionally be  
 followed by a dash and the last  
 two digits of the year in which the  
 standard was adopted. Sun, 20

 Engineering, Manufacture ...  
 The pound per square inch or,  
 more accurately, pound-force per  
 square inch (symbol: lbf/in<sup>2</sup>;  
 abbreviation: psi) is a unit of  
 pressure or of stress based on  
 avoirdupois units. It is the  
 pressure resulting from a force of  
 one pound-force applied to an  
 area of one square inch. Sat, 19
