Sun, 20 May 2018 17:21:00 GMT BACHELOR OF COMMERCE (B.COM-I) - Output in economics is the "quantity of goods or services produced in a given time period, by a firm, industry, or country", whether consumed or used for further production. The concept of national output is essential in the field of macroeconomics. Output (economics) - Wikipedia - In mathematics, computer science and operations research, mathematical optimization or mathematical programming, alternatively spelled optimisation, is the selection of a best element (with regard to some criterion) from some set of available alternatives. Mathematical optimization - Wikipedia -
